

FEBRUARY 2007 EVENT DESCRIPTION

MARINE/AQUATIC PRODUCERS IDENTIFICATION

DEB BURCH AND JANE SONNTAG
ANDOVER HIGH SCHOOL

EVENT DESCRIPTION:

- There will be 25 stations with 45 seconds given for identification at each station.
- At each station, each team will identify by common name an aquatic or marine producer found in New England.
- The materials at each station will be live specimens, preserved specimens and/or pictures of producers.
- In addition, each team needs to answer a question about the taxonomy, structures, relationships with man, ecology or an interesting fact about the example of the producer shown at each station.
- No resources will be permitted during the competition.
- Please bring a pencil or pen with you to write your answers!
- Use any of the reference resources available about these types of algae/producers to prepare for the competition—either online or book resources.
