

EVENT: ANIMAL EVIDENCE

DATE: OCTOBER, 2008 MEET

EVENT RUNNERS: DEB BURCH AND JANE SONNTAG  
ANDOVER HIGH SCHOOL

#### EVENT DESCRIPTION:

How do you know if an animal has passed by your home without ever seeing the actual organism? In this event you will identify the organism which made a "sign" (evidence). There will be 25 stations, each with either a photograph, replica of/or actual evidence of an animal found in New England. You will need to give the common name of the animal and answer a general questions about it. The animals included may be terrestrial or aquatic (including marine animals). Some type of evidence may include prints, scat, nests, exoskeletons, bones, fur, etc. Question topics will include trophic levels, habitats, relationships with other species and relationships with man.

\*\*\*No reference materials will be allowed during the event. As usual, teams need to bring pens or pencils for answering questions!!
