

Earth Science Potpourri

This event will consist of several stations, each with 2-5 questions. The questions will refer to a picture, diagram, map, or specimen at the station. They will cover many topics in earth science, *including but not limited to:*

- Reading a weather station model
 - Recognizing moon phases
- Identifying landforms created by erosion or deposition from water, wind, or ice
 - Identifying chemical vs. mechanical weathering
- Identifying rocks as igneous, sedimentary, or metamorphic
 - Using a topographic map
 - The H-R diagram
 - Reading a weather map
 - The earth's tilt

Students will have appx. 3 minutes to complete each station.

Any questions, please contact Abby Morton at amorton@woburnpublicschools.com.
