## EVENT: FUNGUS AMONG US

**OBJECTIVE:** To correctly identify and know associated information concerning 25 various specimens of fungi and lichen found in New England (from photographs, pictures and/or actual specimens.)

### PROCEDURE:

- Be able to give the common name for each specimen shown.
- Be able to answer one additional question about that organism.
- Additional questions will involve edibility, common predators, relationships with specific nutrient sources, stages in fungi/lichen life cycles, other uses by humans and the ecological niche for that specimen.
- One non-computer resource will be allowed for each team.
- One minute for each station for identification and answering of additional question.
- 50 pts. Total for the event!
